# Results of the FY2019 CSA Service Gap Survey

# Overview

- Background of the Service Gap Survey

- Statewide Service Gaps

- Regional Service Gaps

- Barriers

- Changes in Community Service Capacity

- Conclusions

# Background of the CSA Service Gap Survey

- One primary responsibility of the Community Policy and Management Team (CPMT) is to coordinate long range, community-wide planning to develop resources and services needed by children and families in the community (§2.2-5206).

- The 2006 Virginia General Assembly amended the Code of Virginia to further specify this requirement. On an annual basis, the CPMT shall report to the Office of Children's Services (OCS) on gaps and barriers in services needed to keep children in the local community (§2.2-5211.1.2).

- This report marks the 12th year that data has been collected by OCS on service gaps, barriers to filling these gaps, and local efforts to overcome the barriers.

# Methodology

- Emails sent to CPMT Chairs and CSA Coordinators with link to automated Survey Monkey survey on March 6, 2019

- Survey closed on May 10, 2019

- One submission permitted per locality (some localities filed jointly under one CPMT)

- 114 response out of 126 possible - 90% response rate

- Utilized VDSS regions to group localities

# Service Groupings

## Residential Services

# Conclusions

- Community-based Behavioral Services group selected most often statewide and a top 3 gap in every region

  – Trauma focused/informed Services was selected most often statewide and in 3 of the 5 regions

  – Youth with Multiple Mental Health Diagnoses were identified as the population most often statewide and in the top 3 in all but the Eastern Region

  – High School Age children were selected most often statewide and in every region

# Conclusions (continued)

- Foster Care Services group selected second most often statewide and a top 3 gap in every region

  - Family Foster Care Homes selected most often statewide and in every region

  - Youth with Multiple Mental Health Diagnoses were identified as the population most often statewide and in the top 3 in every region

  - High School Age children were selected most often statewide and in every region

# Conclusions (continued)

- Family Support Services group identified third most often statewide, but in the top 3 in only the Eastern (2$^{nd}$) and Piedmont (1$^{st}$) regions

- Other Service groups selected in the top 3 included Educational (3$^{rd}$) in the Central Region, Crisis Services (3$^{rd}$) in the Northern Region, and Residential Services (3$^{rd}$) in the Western Region

# Conclusions (continued)

- Barriers Weighted by Ranking in Order from Highest to Lowest

  - Provider Availability

  - Lack of Transportation

  - Lack of Funding

  - Need for Collaboration and Consensus

  - Need More information and Data

- Almost 84% of localities initiated actions over the past year to address these perceived barriers
